

# photography on the wall

## product details

### Paper

ILFORD Pearl paper is a heavy weight premium quality paper producing our high quality fine art prints, this paper is very versatile and is ideal for colour and black and white printing. The pearl paper surface eliminates glare giving the true look and feel of photographic prints with impressive pictorial depth. Once printed the paper is then laminated to seal in that quality and provide long lasting results.

### Cameras and Lenses

Cameras used are high specification cameras manufactured by CANON utilising the very latest technology to maximise image quality. Lenses are by Canon and Sigma, both manufacturers of high quality prime and zoom lenses which cover all possible shooting requirements.

### Printers

All our photographs are printed using EPSON STYLUS PRO 9600 seven colour inkjet printers which give superb quality results for both colour and black and white prints thanks to its unique epsom micro piezo printhead technology which also incorporates high density epson ultrachrome K3 with vivid magenta print technology.

### Frames

Our timeless modern classic frames are constructed using high grade lightweight aluminium extrusions having mitred corners and adjustable fixing eyes at rear suitable for hanging or fixing to the wall. Standard finish silver or black.

*"We hope that our photography produced on high quality materials will, once in your house, be there to share, enjoy, and brighten your day. To give you peace and joy, create your space within, and bring out the memories. To be part of you, your little place to hide, old friend to smile at, and be with you every day."*
